

Aluminum Truck Trays Standard Feature

Drop side & Tail gate panels are strong box sections. No bending or twisting under tie down loads. All Carryboy Tray Bodies feature our own unique universal mounting system which has been engineered, tested and approved to the highest standards. Whether you choose the light weight of aluminium or the extra strength of steel, safety and durability are built into all Carryboy Tray products.

Aluminum Trays are available in 3 sizes double cab, extra cab and single cab.

WHY CHOOSE CARRYBOY

1. All aluminium construction means lighter weight greater payload.
2. Any steel fixings are treated so no rust.
3. All aluminium construction is great for beach work, no rust. Easy to Clean
4. 1950 wide tray base, fits all 1 tonne pick ups.
5. Side and rear panels lock together when down, ideal for wider loads.
6. Adjustable dropside catches have nylon wear bushes, no rattles
7. Smooth drop side and tailgate panels, ideal for signs.
8. Aussie designed and built since 1990.
